

Software Engineer

Company Overview:

MUNIRevs was founded with the simple intent of helping communities capture every dollar of revenue. We are doing this by building products that will disrupt the barriers to filing. Our products simplify the process for everyone, from the giant multistate filer to the smallest family business, we work with our municipal clients to help them seamlessly transition their technology and provide customization to meet each unique need.

The MUNIRevs solution is the heart of the product, built to provide a highly customizable option for any government to manage online forms for tax filing, licensing, and renewals. Our Single Filing Portal solution was built to accommodate the complexity of cross jurisdictional filing and allows businesses to file sales tax and submit a single payment across many locations. Our LODGINGRevs solution provides communities with the ability to track short term rental locations, and when combined with our MUNIRevs product, provides a full circle solution.

Job Overview:

The Software Engineer reports directly to the Director of Engineering and may, at times, work directly with other contracted engineers on projects and development.
